

Textecution™ kills texting functions while driving so your child, loved one, or employee lives.

Textecution™ is a user-friendly application that completely disables texting while driving. Textecution™ is designed for parents to install on their teenage driver's phone so they know their child is safer behind the wheel of the vehicle. Add immediate peace of mind, security, and safety today with Textecution™.

How Does It Work?

A very excellent question.

Here is a simplified explanation of how the Textecution™ application works. Once installed, Textecution™ sits quietly in the background and allows you to use your phone as you normally would. Once Textecution™ recognizes that the phone is traveling faster than 10mph, Textecution™ disables the phone's texting feature so text messages cannot be sent or received. Once the phone is at rest, or traveling at a speed slower than 10mph, the texting feature seamlessly becomes available for use, and text messages may be sent or received.

Textecution™ costs only **\$1.99** and is available for download.
